

“alpha 10% Spares Discount”

This is a very simple offer.

If you send any product for Repair/Service and at this point decide to buy an additional Spare via our Service Department, you will receive an extra 10% reduction off your normal purchase price.

It could be the best value for money deal around.

Spares are essential to minimise lost production and disruption. We will always try our best to support our Customers during breakdowns, but we cannot give you back the time & money lost.

Our Service department will always help you to analyse the risk to your business verses the need for spares, to help you make the right decision.
